CONTENTS

Volume 32 No. 1 January 1990

Editorial 1

A. G. Gonzalez and J. Gratton: Compressibility effects on the gravitational instability of a plasma–vacuum interface 3

M. Bessenrodt-Weberpals, A. Carlson, G. Haas, H. D. Murmann, J. Neuhauser, F. X. Söldner, N. Tsois, H. Verbeek and the ASDEX Team: Characterizing the edge plasma of different Ohmic confinement regimes in ASDEX 21

M. Salahuddin: Ion temperature effect on the propagation of ion acoustic solitary waves in a relativistic magnetoplasma 33

B. K. Sinha: Parametric instabilities and plasma turbulence in laser-produced plasma experiments 43

I. S. Lehrman, P. L. Colestock, D. H. McNeill, G. J. Greene, S. Bernabei, J. C. Hosea, M. Ono, J. L. Shohet and J. R. Wilson: Edge measurements during ICRF heating on the PLT Tokamak 51

T. Honzawa: Local concentration of two-dimensionally perturbed ion-acoustic pulses 71

H. Ji, H. Toyama, S. Shinohara, A. Fujisawa and K. Miyamoto: A simple method of equilibrium determination and its application to a RFP plasma with thin shell 79

Book Review
Plasma Diagnostics. Volume I: Discharge Parameters and Chemistry (Reviewed by D. C. Schram) 91

Contents of Journal of Physics D: Applied Physics Volume 22, Number 12 i

Calendar of Conferences iii

Volume 32 No. 2 February 1990

D. Edery and A. Samain: Toroidal coupling and frequency spectrum of tearing modes 93

H. Capes, Ph. Ghendrih, A. Samain, A. Grosman and J. P. Morera: Thermal equilibrium in a diverted plasma 103

D. Lortz: Axisymmetric stability for non-circular cross-section Tokamaks 117

X. GARBET, F. MOURGUES and A. SAMAIN: Microtearing turbulence and heat transport 131

D. ANDERSON and M. LISAK: Variation of prompt alpha particle losses during sawtooth activity in Tokamaks 141

Comment on Published Paper
A. THYAGARAJA: Comments on "The non-linear saturation of a magnetic island" by J. Norris 155

Contents of Journal of Physics D: Applied Physics Volume 23, Number 1 i

Calendar of Conferences..... iii

Announcement iv

Volume 32 No. 3 March 1990

J. GÜLKER and A. STAMPA: Determination of the velocity profile of a streaming highly ionized plasma by laser-induced fluorescence spectroscopy 163

J. A. HEIKKINEN and M. BUREŠ: Fast wave antenna coupling to slow waves and ion Bernstein waves during ICRF heating of Tokamak plasmas..... 173

J. E. STEVENS, C. BUSH, P. L. COLESTOCK, G. J. GREENE, K. W. HILL, J. C. HOSEA, C. K. PHILLIPS, B. STRATTON, S. VON GOELER, J. R. WILSON, W. GARDNER, D. HOFFMAN and A. LYSOJVAN: The effect of ICRF antenna phasing on metal impurities in TFTR 189

C. NIESWAND, M. BORN and J. HACKMANN: Release of beryllium from poloidal limiters in UNITOR 197

C. M. BISHOP and J. W. CONNOR: Heat-pulse propagation in Tokamaks and the rôle of density perturbations..... 203

R. G. GREAVES and P. J. BARRETT: Departure from quasilinear heating in a cross-field ion beam experiment 213

Letter to the Editor
V. D. SHAPIRO, V. I. SHEVCHENKO, V. I. SOTNIKOV, V. FIALA and P. TRISKA: Plasma heating near a VLF antenna 221

Contents of Journal of Physics D: Applied Physics Volume 23, Number 2 i

Calendar of Conferences..... iii

Volume 32 No. 4 April 1990

K. Okano, Y. Ogawa and H. Naitou: Self-consistent analysis of steady state Tokamaks sustained by beam-driven and bootstrap currents 225

D. Hildebrandt, J. Bakos and G. Petravich: Impurity flux collection at the plasma edge of the Tokamak MT-1 241

D. Lebeau, R. Koch, A. M. Messiaen, P. E. Vandenplas and R. R. Weynants: ICRH modulation on TEXTOR: eigenfunctions of the quasilinear Fokker–Planck equation and experimental results 249

A. Miller, J. Manickam and J. L. Johnson: Comparison of ballooning mode stability properties of Tokamaks with circular and elliptical cross-sections with the same poloidal flux 271

M. Mausbach and K. Wiesemann: An experimental study of the anisotropy of the electron distribution function in an ECR plasma by means of a double retarding field analyser 281

T. Rowlands: The Gauge and Lorentz invariance of the non-linear ponderomotive 4-force 297

Research Note

M. Kaufmann, W. Sandmann, M. Bessenrodt-Weberpals, K. Büchl, O. Gruber, O. Kardaun, K. Lackner, R. Lang, V. Mertens, H. Murmann, J. Neuhauser and F. Söldner: Electron temperature profiles in discharges with pellet injection and in other mode discharges 303

Contents of Journal of Physics D: Applied Physics Volume 23, Number 3 i

Calendar of Conferences iii

Volume 32 No. 5 June 1990

A. B. Bud'ko, M. A. Liberman and F. F. Kamenets: Self-similar dynamics of dense Z-pinches 309

S. M. Golberg, M. A. Liberman and A. L. Velikovich: Plasma compression, heating and fusion in megagauss Z–θ pinch systems 319

M. Hossain and H. R. Strauss: Profile consistency in quasilinear and nonlinear high beta magnetohydrodynamic computations 327

N. J. Fisch and A. H. Kritz: Loop-voltage tomography in Tokamaks using transient synchrotron radiation 335

M. K. Srivastava, S. V. Lawande and B. K. Sinha: Rarefaction shocks and diagnostics of a two-temperature plasma 359

S. V. Bulanov, S. G. Shasharina and F. Pegoraro: MHD modes near the X-line of a magnetic configuration 377

Y. Nishida. A. Lee, N. C. Luhmann Jr and M. Rhodes: Collapse of electron plasma wave in microwave plasma interaction 391

Letter to the Editor

M. Giubbilei, P. Martin and S. Ortolani: A mechanism for plasma heating in driven relaxing magnetic field configurations 405

Book Reviews

Plasma Physics for Nuclear Fusion (revised edition) (Reviewed by J. A. Wesson) 413

RF Plasma Heating in Toroidal Fusion Devices (Reviewed by B. Lloyd) 413

Reviews of Plasma Physics Vol. 14 (Reviewed by R. A. Cairns) 414

Contents of Journal of Physics D: Applied Physics Volume 23, Number 4 i

Calendar of Conferences iii

Volume 32 No. 6 July 1990

S.-I. Itoh, N. Ueda and K. Itoh: Simulation study of scalings in scrape-off layer plasma by two-dimensional transport code 415

K. Tobita, T. Itoh, A. Sakasai, Y. Kusama, Y. Ohara, Y. Tsukahara, M. Nemoto, Y. Kawano, H. Kubo, H. Takeuchi and T. Sugie: Measurements of neutral beam stopping for hydrogen and helium in the JT-60 plasma 429

H. R. Wilson: Generalization of the ballooning Δ' to poloidally asymmetric Tokamak equilibria 443

Letters to the Editor

T. N. Todd: Ultra-simple stellarators 459

A. R. Piriz and G. Wouchuk: Laser driven implosion of high aspect ratio spherical shell target 469

P. C. Stangeby, S. K. Erents, L. de Kock and J. A. Tagle: Cross-field diffusion coefficients measured in the JET edge for constant plasma current 475

Book Reviews

Numerical Simulation and Optimal Control in Plasma Physics (Reviewed by S. Jardin) 481

Plasma Waves (Reviewed by M. BRAMBILLA) 482

Contents of Journal of Physics D: Applied Physics Volume 23, Number 5 i

Calendar of Conferences..... iii

Volume 32 No. 7 July 1990

B. LABOMBARD, R. W. CONN and G. TYNAN: An electrostatic barrier scrape-off layer for control of core plasma effluxes in Tokamaks..... 483

C. T. HSU and D. J. SIGMAR: Transport induced by ion-impurity friction in strongly rotating, collisional Tokamak plasma 499

G. N. THROUMOULOPOULOS and G. PANTIS: Axisymmetric force-free states and relaxation of a spheroidal Spheromak..... 541

P. M. COX: Resistive and viscous effects on *z*-pinch stability 553

Contents of Journal of Physics D: Applied Physics Volume 23, Number 6 i

Calendar of Conferences..... iii

Announcement iv

Volume 32 No. 8 August 1990

B. ZURRO, C. HÍDALGO, B. GARCÍA-CASTAÑER and C. PARDO: Observation of thermal decoupling of highly ionized impurities and protons in the TJ-I Tokamak and its interpretation 565

A. J. KNIGHT and I. R. JONES: A quantitative investigation of rotating magnetic field current drive in a field-reversed configuration..... 575

W. HERRMANN: On the possibility of measuring the *q*-profile in dense plasmas by means of molecular hydrogen beams 605

O. HURTAK: Aperiodically-phased multijunction sections as components of large launching structures for LHCD 623

M. J. ALPORT and E. G. VAN NIEKERK: The propagation of ion cyclotron waves in a Q-machine 637

H. VERBEEK, W. POSCHENRIEDER, A. CARLSON, J.-K. FU, K. MCCORMICK, N. TSOIS, F. X. SÖLDNER and the ASDEX TEAM: The particle fluxes in the edge plasma during discharges with Improved Ohmic Confinement in ASDEX 651

Conference Report
Report on the 8th European Tokamak Programme Workshop (Gut Ising, F.R.G., 13–15 December 1989) (collated by F. ENGELMANN) 659

Contents of Journal of Physics D: Applied Physics Volume 23, Number 7 i

Calendar of Conferences iii

Volume 32 No. 9 September 1990

P. C. STANGEBY and C. FARRELL: The plasma contamination efficiency of different impurity generation mechanisms in limiter Tokamaks 677

A. T. BOGDANOV: Weak turbulence and broad-spectrum excitation in a nonmagnetized electron beam via second-harmonic generation 703

P. A. KRUG, R. BEHN, S. A. SALITO and M. R. SIEGRIST: Precision of ion temperature measurements in a Tokamak plasma using collective Thomson scattering: a numerical study 713

Q. D. ZHONG: Effect of detuning on the beat wave saturation amplitude in a plasma 729

L. GOMBEROFF and P. VEGA: Electrostatic instabilities driven by ion beams 737

Letter to the Editor
E. R. SOLANO: Effect of plasma minor radius changes on Tokamak position stability 759

Contents of Journal of Physics D: Applied Physics Volume 23, Number 8 i

Calendar of Conferences iii

Announcement iv

Volume 32 No. 10 October 1990

A. I. KLEEV and A. L. VELIKOVICH: Filamentation instabilities of dynamic Z pinches and theta pinches 763

S. YAGURA, H. MIYAZAKI, Y. OKUNO, H. FUJITA and R. J. ARMSTRONG: ESIC waves at large angles to the magnetic field 779

S. T. IVANOV, E. G. ALEXOV, A. T. BOGDANOV and P. N. MALINOV: Surface wave evolution in a waveguide with an axial plasma column upon changing the external magnetic field 791

J. W. CONNOR, S. C. COWLEY and R. J. HASTIE: Micro-tearing stability in Tokamaks 799

E. MINARDI and G. LAMPIS: Maximum entropy Tokamak configurations 819

Book Reviews

High Resolution X-ray Spectroscopy of Cosmic Plasmas: IAU Colloquium 115 (Reviewed by F. D. KAHN) 833

Space Plasma Physics: I. *Stationary Processes* (Reviewed by A. O. BENZ) 833
